Performance

Collective investment schemes in securities (unit trusts or funds) are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to future performance. The Management Company does not provide any guarantee regarding the capital or the performance of the Fund. Performance figures are provided by the Investment Manager and are for lump sum investments with income distributions reinvested. Actual investor performance may differ as a result of the investment date, the date of reinvestment and applicable taxes.

Unit Price

Unit trust prices are calculated on a net asset value basis, which is the total market value of all assets in the Fund, including any income accruals and less any permissible deductions from the Fund, divided by the number of units in issue. Forward pricing is used and fund valuations take place at approximately 15:00 each business day. Purchase and redemption requests must be received by the Management Company by 10:00 each business day to receive that day's price.

Foreign Exposure

This fund may have foreign exposure through secondary listings that are inward listed on the Johannesburg Securities Exchange (JSE). Additionally the fund can invest up to 35% in assets listed on markets outside of Africa.

FTSE/JSE Capped Shareholder Weighted Index (SWIX)

The FTSE/JSE Capped SWIX All Share Index represents 99% of the full market cap value of all eligible securities listed on the Main Board of the JSE however, all constituents are weighted by an alternate free float, called the SWIX free float. The SWIX free float represents the proportion of a constituent's share capital that is held in dematerialised form and registered on the South African share register, maintained by Strate. The SWIX free float is the minimum of the percentage shares held on Strate and the company free float. Source: JSE
